WORK EXPERIENCE:

Research Assistant	LSU Digital Media Arts & Engineering	May 2026 - current
<i>Baton Rouge, LA</i>		

As an undergraduate research assistant with the Digital Media Arts & Engineering program at LSU, I support a variety of interdisciplinary projects while expanding my knowledge of emerging technologies and digital media workflows. My research and development experience includes MetaHumans, injury prevention through digital human avatars, photogrammetry and volumetric video, and educational game development focused on health and wellness.

Apprenticeship	LSU DMAE, Pennington Biomedical Research Center	January 2026 - current
<i>Baton Rouge, LA</i>		

As an apprentice through the Digital Media Arts & Engineering program at LSU, I am working with a group of graduate students to design and develop a web browser game for Pennington Biomedical Research Center. The game's intention is to educate and help prevent childhood obesity and type 2 diabetes. I assist in the full production process of the game, including the art, animation, level design, game logic building, game mechanics creation, world building, etc.

Fabrication Lab Assistant

LSU College of Art & Design

February 2025 - current

Baton Rouge, LA

Student worker through the Presidential Aid Scholarship program. Lab assistant focusing on 3d printing, modeling, and overall fabrication lab work with Prusa, Autodesk Fusion, and other CAD software.

Art Camp Director

BREC

May 2025 - April 2026

Baton Rouge, LA

As an Art Teacher through Recreation, I am responsible for planning, organizing, and leading creative projects, daily activities, and events for students of varying ages and skill levels. I develop engaging lesson plans that foster artistic expression, creativity, and confidence, while also managing classroom dynamics and supporting a positive, inclusive environment.

Concept Artist

LSU Digital Media Arts & Engineering

March 2025 - September 2025

Baton Rouge, LA

Artist for one of the LSU DMAE Program's graduate students. We are currently working on creating an 8-sectioned, creative racing game that goes through different types of everyday environments with a fantastical twist.
